

WaveSecure

Introducing WaveSecure
Our technology. Your peace of mind.

WaveSecure is the essential security companion for your phone. With WaveSecure, you will never have to worry about losing your phone, your data and your privacy ever again.

At the click of a button, you can remotely lock down the phone and track it down. It automatically helps you securely keep a copy of your data online, and enables you to wipe data off your phone.

If you're constantly worried about someone stealing your phone, or if you're the kind who carelessly leaves your belongings behind, then you'll love the WaveSecure technology. After installing it into your phone, you're presented with several features that will give you peace of mind. Is someone using your phone without permission? Just remotely Lock your phone! If your phone is stolen and the SIM card is replaced, you can still Track down the thief. Your stolen phone will report the new number to you, making it easier for you to track down the phone or make a report. And with the special WipeOut function, you can immediately erase any sensitive information like address books, SMS, videos and photos. You can install WaveSecure on most Symbian-operated and Windows Mobile phones. Check out their website for more details.
