

tenCube Pte Ltd

tenCube specialises in mobile security solutions where security is designed with user productivity in mind. The company has a strong track record of serving government agencies, and has developed solutions for the Singapore Police Force and the Centre for Strategic Infocomm Technologies. tenCube is recognised as one of the hottest 100 technology startups in Asia by Red Herring; has received The Enterprise Challenge award for public service from Singapore's Prime Minister's Office, and is the Grand Champion of Startup@Singapore.

WaveSecure

WaveSecure is a practical security suite that tenCube terms "Mobile Security, Human Edition". WaveSecure's patent-pending tracking technology ensures continuous connectivity such that a mobile device can be remotely controlled in real time. This removes the need to enforce traditional preventive security controls such as power-on password and disk encryption. WaveSecure enables real time security policy updates and device management, thus leaving the user to concentrate on the primary purpose of the mobile device – productivity on the go. WaveSecure was named one of the "Top 10 Wireless Innovations in Asia Pacific" by Frost & Sullivan.

- Manage thousands of mobile devices and their data from a Web-based console
- Customise and enforce security policies wirelessly and cost-effectively
- Provide detailed audit trails and reports for compliance, control and evidence
- Lock lost or stolen devices remotely to make the devices worthless
- Back up or wipe data remotely from device memory, memory cards and SIM cards
- Windows Mobile versions supported include Windows Mobile 2003, Windows Mobile 2003 SE, Windows Mobile 5, Windows Mobile 6

“As organisations rapidly mobilise their workforce by empowering them with mobile Push Mail, CRM, Field-Force Automation etc, sensitive corporate and personal data becomes vulnerable to a new kind of threat – loss and theft. This is a very real, very immediate problem that we try to solve without hampering user productivity.”

Darius Cheung, CEO, tenCube Pte Ltd
